LIST OF CONTENTS

Number 1

G. A. Florides, L. C. Wrobel, S. A. Kalogirou and S. A. Tassou 1 A thermal model for reptiles and pelycosaurs

H. Ochoa-Acuña and T. H. Kunz 15 Thermoregulatory behavior in the small island flying fox, *Pteropus hypomelanus* (Chiroptera: Pteropodidae)

E. M. Dzialowski and M. P. O'Connor 21 Utility of blood flow to the appendages in physiological control of heat exchange in reptiles

T. Rhen and J. W. Lang 33 Temperature during embryonic and juvenile development influences growth in hatchling snapping turtles, *Chelydra serpentina*

Tracy A. Maddocks and Fritz Geiser 43 The thermoregulatory limits of an Australian Passerine, the Silvereye (*Zosterops lateralis*)

L. M. Sievert and P. Andreadis 51 Specific dynamic action and postprandial thermophily in juvenile northern water snakes, *Nerodia sipedon*

S. Harpaz, K. Becker and R. Blum 57 The effect of dietary L-carnitine supplementation on cold tolerance and growth of the ornamental cichlid fish *Pelvicachromis pulcher*—preliminary results

I. Lesná, S. Vybíral, L. Janský and V. Zeman 63 Human nonshivering thermogenesis

Shlomo Yahav 71 The effect of constant and diurnal cyclic temperatures on performance and blood system of young turkeys

Jeff L. Sibley, John M. Ruter and D. Joseph Eakes 79 Root membrane thermostability of red maple cultivars

Number 2

G. B. Borovskii, V. K. Voinikov and A. V. Kolesnichenko 91 The effect of hypothermia on the content of 310 kD stress protein in seedlings of winter rye and wheat

Jonathan R. Ek, Edward F. Bell, Ralph A. Nelson and Mohamed A. Radhi 97 Infrared thermographic calorimetry applied to preterm infants under radiant warmers

W. T. Zhou, M. Fujita and S. Yamamoto 105 Effects of ambient temperatures on blood viscosity and plasma protein concentration of broiler chickens (*Gallus domesticus*)

M. P. O'Connor 113 Physiological and ecological implications of a simple model of heating and cooling in reptiles

T. A. Zari 137 Seasonal acclimatization in metabolic rate of the fan-fingered gecko, *Ptyodactylus hasselquistii* (Reptilia: Gekkonidae)

I. T. Ivanov 143 Impact of thermohaemolysis-associated membrane alteration on the passive ion permeability and life-span of erythrocytes

151 Subject Index

Number 3

Fernando Díaz and **L. Fernando Bückle** 155 Effect of the critical thermal maximum on the preferred temperatures of *Ictalurus punctatus* exposed to constant and fluctuating temperatures

Jon P. Costanzo, Jacqueline D. Litzgus and **Richard E. Lee Jr** 161 Behavioral responses of hatchling painted turtles (*Chrysemys picta*) and snapping turtles (*Chelydra serpentina*) at subzero temperatures

Candace B. Matthew, Ingrid V. Sils and **Kimberly A. Tartarini** 167 The effects of estrogen on thermoregulation, heart rate, and activity in the female rat with comparisons to males

T. V. Kozyreva, E. Ya Tkachenko and **V. P. Kozaruk** 175 Thermoregulatory response to cooling before and after the noradrenaline iontophoresis to skin

W. T. Zhou, M. Fujita and **S. Yamamoto** 185 Thermoregulatory responses and blood viscosity in dehydrated heat-exposed broilers (*Gallus domesticus*)

W. T. Zhou, N. Chaiyabutr, M. Fujita and **S. Yamamoto** 193 Distribution of body fluid and change of blood viscosity in broilers (*Gallus domesticus*) under high temperature exposure

S. E. Taylor, S. Egginton, E. W. Taylor, C. E. Franklin and **I. A. Johnston** 199 Estimation of intracellular pH in muscle of fishes from different thermal environments

Zoltán Szelényi 209 Obituary: Szilárd Donhoffer (1902–1999)

Number 4

A. V. Kolesnichenko, E. A. Ostroumova, V. V. Zykova and **V. K. Voinikov** 211 The comparison of proteins with immunochemical affinity to stress protein 310 kD in cytoplasmatic proteins of winter rye, winter wheat, *Elymus* and maize

I. T. Ivanov, S. Boytcheva and **G. Mihailova** 217 Parallel study of thermal resistance and permeability barrier stability of *Enterococcus faecalis* as affected by salt composition, growth temperature and pre-incubation temperature

D. Renault, C. Salin, G. Vannier and **P. Vernon** 229 Survival and chill-coma in the adult lesser mealworm, *Alphitobius diaperinus* (Coleoptera: Tenebrionidae), exposed to low temperatures

R. B. Hardin, D. J. Eakes, J. L. Sibley, C. H. Gilliam and **G. J. Keever** 237 Root membrane thermostability of *Cornus florida* L. provenances

Sara L. Frears, Steven L. Chown and **Peter I. Webb** 241 Temperature dependence of feeding behaviour in the mopane worm (Lepidoptera)

M. Koratich and **S. L. Gaffin** 245 Mechanisms of calcium transport in human endothelial cells subjected to hyperthermia

Stephen L. Gaffin 251 Simplified calcium transport and storage pathways

Peter B. Sharpe and **Beatrice Van Horne** 265 Relationships between the thermal environment and activity of Piute ground squirrels (*Spermophilus mollis*)

A. Haim, A. Shabtay and **Z. Arad** 279 The thermoregulatory and metabolic responses to photoperiod manipulations of the Macedonian mouse (*Mus macedonicus*), a post-fire invader

Number 5–6

E. Zeisberger 287 From humoral fever to neuroimmunological control of fever

Neural Control of Thermoregulation

J. A. Armengol, P. Salinas, E. Tavares, F. J. López-Valpuesta, M. J. Dascombe and **F. J. Miñano** 327 Expression of NADPH-diaphorase in nucleus tractus solitarius after peripheral injection of *E. coli* endotoxin in rats

Jack A. Boulant 333 Cellular mechanisms of neuronal thermosensitivity

M. Dewald, N. Anthes, H. Vedder, K. Voigt and **H. A. Braun** 339 Phasic bursting activity of paraventricular neurons is modulated by temperature and angiotensin II

M. Hashimoto, A. Kuroshima, J. Arita and **M. Shibata** 347 Brown fat temperature decrease by electrical stimulation of in and around retrorubral field in the golden hamster

K. Kanosue, X-M. Chen, T. Hosono, T. Yoda and **S. Liu** 351 Inhibitory control of shivering and nonshivering thermogenesis by preoptic warm-sensitive neurons

Francisco Martínez, Vicente Vicente-Ortega, Arturo J. Brugger, Rafael Peñafiel and **Asunción Cremades** 355 Effects of central administration of lead, cadmium and other divalent cations on body temperature in mice

M. Monda, A. Viggiano, A. Sullo, G. Manzi and **V. De Luca** 359 Intracerebroventicular injection of prostaglandin E_1 increases γ-aminobutyric acid level in the posterior hypothalamus

M. Shibata, T. Uno and **M. Hashimoto** 365 Neurons in the lower midbrain tonically inhibit non-shivering thermogenesis through their influence on inferior olivary neurons in anesthetized rats

M. Székely and **J. B. Mercer** 369 Thermosensitivity changes in cold-adapted rats

Thermoregulation in Hot and Cold Environments

B. Buzadžić, B. Korać and **V. M. Petrović** 373 The effect of adaptation to cold and re-adaptation to room temperature on the level of glutathione in rat tissues

G. Cvijić, J. Djordjević, V. M. Petrović and **V. Davidović** 379 Effect of heat exposure on the activity of monoamine oxidase in the rat brain and interscapular brown adipose tissue

V. Davidović, I. Đokić, N. Petrović, S. Đurašević and **G. Cvijić** 385 Activity of antioxidant enzymes in rat skeletal muscle and brown fat: effect of cold and propranolol

Michel B. Ducharme, Dragan Brajkovic and **John Frim** 391 The effect of direct and indirect hand heating on finger blood flow and dexterity during cold exposure

R. Grucza, H. Pekkarinen and **O. Hänninen** 397 Different thermal sensitivity to exercise and cold in men and women

W. Haddad and **M. Horowitz** 403 Heat acclimation alters nitric oxide response in the splanchnic circulation

Susanne Hedlund, Hari Shanker Sharma, Per-Ove Sjöquist and **Jan Westman** 409 A new antioxidant compound H-290/51 attenuates heat shock protein (HSP 72 kD) response, edema and cell injury following acute heat exposure. An experimental study using light and electron microscopy in the rat

K. P. Ivanov 415 Subject of temperature control and the main function of thermoregulation of an organism

M. T. Lin, Y. L. Yang and **H. J. Tsay** 423 C-fos expression in rat brain during heat stress

Márcia Nishizawa, Patrícia E. N. Giviziez, Jesus A. Ferro, Maria I. T. Ferro and **Marcos Macari** 429 Effect of heat stress or lipopolysaccharide (*E. coli*) injection on HSP70 levels in the liver and brain of adrenalectomized rats

Ratko Radojičić, Gordana Cvijić, Ivana Đokić and **Vukosava Davidović** 433 Effect of propranolol and cold exposure on the activities of antioxidant enzymes in the brain of rats adapted to different ambient temperatures

H. S. Sharma, K. Drieu, P. Alm and **J. Westman** 439 Upregulation of neuronal nitric oxide synthase, edema and cell injury following heat stress are reduced by pretreatment with EGB-761 in the rat

S. J. Won, H. F. Huang and **M. T. Lin** 447 Heatstroke induces a reduction of natural killer cell activity in rats

Metabolic and Chronological Aspects of Thermoregulation

A. Haim and **N. Zisapel** 455 Daily rhythms of nonshivering thermogenesis in common spiny mice *Acomys cahirinus* under short and long photoperiods

A. Korać, J. Radovanović, V. Davidović, V. Koko and **M. Nedeljković** 461 Apoptosis in the rat brown adipose tissue after insulin treatment

A. S. Milton, G. A. Carr, C. D. Luby, J. A. Scarlett, R. White and **B. A. Callingham** 465 Changes in reactivity of the digital artery of the fallow deer, *Dama dama*, in summer and winter

Ilona Pokora, Ryszard Grucza and **Hanna Kaciuba-Uściłko** 471 Influence of a low-carbohydrate diet on thermoregulatory responses to prolonged exercise in men

R. Refinetti 477 Amplitude of the daily rhythm of body temperature in eleven mammalian species
